

Are you Paying For Water You're Not Using?

7 Reasons to Watch Your Water Usage

1. Keep your costs down despite water and energy charges increasing
2. Minimise associated costs such as sewerage charges and energy costs for heating water
3. Identify significant water leaks and inefficiencies which are often unrecognised
4. Your business could cost-effectively save 20% of water use with minimal disruption
5. Limit use of expensive water produced by desalination plants as rainfall declines
6. Win community support through meeting expectations on business to do its part to save water
7. Be part of the water solution while saving money

Ways to Pay Only for the Water You Use

- Find and fix leaks
- Identify and implement cost-effective improvements
- Raise staff and contractor awareness
- Ensure automatic systems (eg irrigation, air conditioning) are working correctly

How WaterProof™ Services Can Help You

Water Forensics –analyse historic and current water use patterns

- Leakage
- Analysis of bill history
- Unusual changes in water use patterns

Water Efficiency Inspection and Audit –examine points of water use

- Cost-effective hardware replacements
- Distribution of water use across the business
- Water Efficiency Management Plans (WEMPs)

Water Charges Analysis – examine sewerage and meter charges

- Sewerage discharge charging
- Meter size charging
- Liaising with Water Corporation staff

Training – improve staff and contractor awareness

- Water use monitoring
- Ongoing staff support
- Continual improvement

WaterProof™ Your Business in 2014
